Residential Maintenance & Warranty Guide
Pre-Finished Engineered & Solid Hardwood Flooring
NuOil®
Hybrid Multi-layer Oil Finish
Hallmark NuOil® Warranty

Pre-Installation Warranty: Before leaving the factory each Hallmark Floors, hardwood floor is carefully inspected, and shipped in sealed packaging to keep the product stable. We require inspection of the material prior to installation. It is imperative that the homeowner look at the material to determine whether the color and appearance of the floor are what they expected. Any boards that are defective should be set aside and they will be replace. Wood materials have inherent character that cannot always be fully viewed in a display sample or hand set. Samples exposed to ultra violet light can also experience subtle changes.

Inspect all materials carefully prior to installation. Warranties do not cover materials with visible defects once they are installed. Installation constitutes acceptance.

NOTE: Organic Solid & Engineered 5 6 7 are textured prior to drying, to achieve the true look of reclaimed. As such the edges will have height variations just like material reclaimed from an old building. Height variation from plank to plank is an inherent part of the rough sawn nature of reclaimed, which Hallmark floors emulates in our manufacturing process. This is not considered to be a defect.

Residential Limited Lifetime Structural Warranty: Hallmark Floors warrants that the floorboards will remain free from manufacturing defects for as long as installation & environmental requirements have been met and the original purchaser owns and occupies the home. In the unlikely event that any structural aspect of the plank fails, Hallmark Floors will repair, or replace the failed planks of your floor (our option). The factory warranties apply only to the original owner and are non-transferable.

Residential Limited Lifetime Finish Warranties: NuOil® hybrid multi-layer oil finish in residential settings are guaranteed for the lifetime of original owner (non-transferable). All maintenance requirements must be met for warranty to apply. Use of maintenance products other than Hallmark NuOil® maintenance products will invalidate the finish warranty. Any wear through must exceed 10% of total floor for warranty to apply.

Commercial Warranties:
3 year Finish Warranty
10 year Structural Warranty

Claims Administration: In the unlikely event that any aspect of the plank fails, Hallmark Floors will repair, or replace the failed planks of your floor (our option). Should total replacement be required, Hallmark Floors Inc. will replace the floor one time only. After one time replacement, Hallmark Floors’ warranty obligations will be complete and no further warranties will be offered. If a claim needs to be started, an inspection by the retailer is required, and a Dealer Inspection Report filed with our local distributor. Should the retailer be unable to resolve the concerns a follow-up inspection will be conducted by the Hallmark Regional Distributor.

Radiant Heat Warranty: It is critical that the floor be installed to Hallmark Floors’ specifications. The surface temperature of the floor should not exceed 80°F. Relative humidity should be maintained at between 30 to 55%. Hydronic, water-based systems must be used (see installation instructions and radiant heat guide for greater detail). Use of electric mat systems is not authorized. Installation with radiant heat should be performed using the floating or glue down installation method.

Products Excluded from Radiant Heat Warranty: All Hickory and Solid products, Exotics (Brazilian Cherry and Sucupira).

Exclusions to Warranties

1. Color Variation: Wood is a natural product and will vary in color and grain appearance from board to board. This is considered a natural aspect of the product.

2. Light/Sunlight Exposure: Changes will occur (patina) when wood is exposed to UV rays from sunlight, florescent, LED, and incandescent bulbs. Window coverings, UV resistant tint, solar screens can minimize but not eliminate this natural occurrence. Walnut and tropical species, such as Brazilian Cherry, (Exotic Collection), are more susceptible to light due to their high content of natural oils.

3. Squeaky Floors: Squeaks are related to movement. Incorrect installation methods, or structural issues create squeaking and is not considered a defect.

4. Pre-Installation Inspection of Boards: Boards containing manufacturing defects are eligible for replacement. Return unused boards for free replacement material. However, material that is subjectively viewed as defective but meets Hallmark Floors’ and industry standards for grade will not be replaced. Boards that are installed when visibly defective will not be eligible for replacement.

5. Improper Installation: Failure to follow installation instructions will invalidate the warranty. Cabinets and built in appliances should be installed prior to the installation of the hardwood floor. Cabinets and built in appliances should never be installed on top of the wood floor. Hardwood flooring should be installed at the same time as carpet after finishing walls, cabinet installation, appliance installation, tile and countertop installation.

NOTE: Should cabinets be installed on top of wood floors, product warranty remains in tact. However, in the unlikely event that the floor experiences problems, Hallmark Floors will not pay for the removal or reinstallation of cabinets and countertops, since installing them on top of the floor does not represent best practice. Never install cabinets on top of floating wood floor.

6. Gloss Levels and Color Variation: Wood is a natural product, color and gloss level can vary from board to board.

7. Adverse Environment: Damage created by moisture (originating from any source), sharp objects, sand, gravel, or other abrasive material, loss of sheen, scratches, high heels, dents caused by unprotected chair/furniture legs, and pet urine, vomit, or pet claw damage is excluded from this warranty. Use of hardwood flooring in laundry rooms and full bathrooms is not recommended. When moving appliances use proper appliance
dolly’s, glides, or 1/8” Masonite on the floor shiny side down. Rolling appliances directly across the floor will damage the hardwood floor.

8. Reaction to Environmental Conditions: Wood is a product of nature. As a natural material, it will expand and contract as it gains and loses moisture. Some gaps between the boards during low-humidity seasons are normal and not considered a defect. Maintaining optimum humidity levels of 30 to 55% will minimize these occurrences. Allowing relative humidity levels to fall below 30% can result in structural damage to the floor such as large gaps, splits in the surface, distortion of the boards and structural failure. Humidity levels above 55% can result in surface warping and structural failure of the boards.

9. Maintenance: Full compliance with maintenance instructions is required. Hallmark NuOil® Floor cleaner and Hallmark NuOil® ReNu must be used. Use of steam cleaners will damage the floor and invalidate the warranty.

10. High Traffic Areas: High traffic areas may experience finish wear through. More than 10% of the total surface area must be affected for the Residential and Commercial Finish Warranties to apply. Please note scratches are not covered under warranty.

11. Internet Purchases: Hallmark Floors does not warrant product purchased on the internet. Only product purchased from an authorized displaying dealer and serviced locally will be covered under warranty. Any claim must be accompanied by an original dealer invoice and original dealer inspection report. NOTE: See Hallmark Floors website for full internet selling policy at www.hallmarkfloors.com.

This warranty is limited to residential use and does not apply to industrial or commercial use. When unauthorized maintenance products are used or when wet mopping occurs, the warranty becomes void. If any product is abused, improperly installed (see installation instructions), or damaged by moisture intrusion, plumbing leaks, insects, building defects, floods, or circumstances beyond our control the warranty is no longer valid. Hallmark Floors will not be responsible for any special, incidental, or consequential damages including inconvenience or loss of time.

This warranty applies to all Hallmark Floors Hardwood Flooring products purchased after January 1, 2017. It is valid for the original purchaser/resident only and is non-transferable. No agent, dealer, fabricator, installer, or employee of Hallmark Floors Inc., is authorized to alter or increase the terms, limitations, or obligations of this warranty. In the event that warranty service is required, please contact your original Hallmark Floors retailer to arrange an evaluation of the floor. Should further evaluation be needed your retailer will need to contact the local distributor to begin the warranty process. The local distributor will forward the inspection report to Hallmark Floors Inc. for review.

This warranty shall be governed by the laws of the state of California and any applicable federal laws of the United States. Any action brought seeking the resolution of any controversy arising out of or relating to any warranties referenced herein shall be brought in in the courts of the state of California, County of San Bernardino.

Hallmark NuOil®

NuOil®: Several wood flooring collections from Hallmark have this two stage hybrid oil system. Designed for superior wear and stain resistance. A 21st century version, dramatically improved performance of an ageless style of finishing

- Alta Visa
- Ventura (Oak)
- Organic Solid
- Organic Engineered
- Novella – Oak Selections

Maintenance Guide

1. Use Hallmark NuOil® Natural Oil Cleaner and NuOil ReNu® Exclusively: These products are designed to clean and maintain the hybrid NuOil® Finish.

2. Do not use unauthorized maintenance Products: Such as oil soaps, paste wax, or other cleaners containing lemon oil, citrus oils, Tung oils, ammonia, or cleaners containing silicone. Do not use two in one cleaners that contain acrylics or urethane polish to restore gloss. Use of these products invalidates the product warranty.

3. Use Hallmark ReNu®: For shine retention, traffic patterns and minor surface scratches. Please note scratches are not covered under warranty.

4. Pets: Keep nails well trimmed and paws free of dirt, gravel, grease, oil, and other staining agents. Wipe up animal urine or vomit immediately as they can damage the floor.

5. Regular Maintenance Dust Removal: Hallmark Floors’ Hardwood products finished with NuOil® Hardwood flooring is a good choice for healthy indoor living. Dust and allergens are easily removed with canister vacuum and soft brush attachment. Removal of dust and grit with regular vacuuming removes these abrasive agents for good long term performance of the floor. The brush should be replaced as needed to prevent scratching of the floor. Perform as needed (average in normal household is weekly) NOTE: Do not use treated commercial dust-mop or treated dust pads of any kind as they can contain petroleum based solvents that can leave a chemical residue on the floor.

6. Clean Up All Spills: Spills can be cleaned up with a moistened, well wrung out soft cloth or sponge. Once the spill is removed, spray Hallmark Floors’ NuOil® Cleaner on clean, moist, towel to remove all remaining residue. All spills must be cleaned up immediately to prevent damage to the floor.
7. Shake spray bottle NuOil® Natural Oil Cleaner: Before use, gently shake the bottle to make sure the natural oils and cleaning agents are well mixed. (30 seconds avg.)

8. Regular Cleaning: Follow the instructions on the bottle of Hallmark Natural Oil Cleaner. The cleaner can be sprayed on the head of the Micro Fiber Mop directly to the floor in a fine mist. This mop system consists of a microfiber applicator head. The microfiber mop head must be moistened with water and well wrung out before applying the cleaner.

9. Wipe the Surface with Micro Fiber Mop: Rub microfiber mop with direction of the grain. When the applicator is showing dirt replace with a clean one as needed and launder microfiber mop heads after every use.

10. No Wet Mopping/Steam Cleaners: Do not use string mops, sponge mops, or steam cleaners to clean a Hallmark Floors floor.

11. Dent/Scratch Prevention: Cloth glides must be applied to chair and furniture legs. Do not use rubber, plastic or metal glides. Please note scratches are not covered under warranty. Double barrel coaster wheels should replace hard rubber or metal wheels. High-heel shoes can damage a hardwood floor. It is important to keep the tips in good repair.

12. High Heel Shoes: High-heel shoes can damage a hardwood floor. It is important to keep the tips in good repair.

13. High-Traffic Areas: To minimize scuffing and scratching, some additional precautions can be taken. Place area rugs in high-traffic areas. Place walk-off mats both outside and inside exterior doors. Also place mats at the kitchen sink and stove. 

NOTE: Leaving a building/structure unoccupied without climate control for extended periods of time can lead to damage to the floor from excessive humidity build-up or extremely dry conditions. Both scenarios can damage the floor, cabinets, and furniture.

14. Rug Backers & Pads: Rugs with solid rubber backs should not be used as they cannot breath and could discolor or make the surface of the floor more slippery.

An elephant has a force of 50 to 100 pounds per square inch (psi) on a floor, while a 125-pound woman in high heels has the force of 2,000 psi. That’s 20 times greater than the elephant.

Available on Amazon or EZ Glide websites.

Jute back rugs can scratch a floor unless a rug pad is in place underneath. Pads containing PVC can damage floor finishes. Bonding agents in PVC pads can off-gas and damage the finish.

Super-Lock & Anchor Grip are provided by RugPad USA and can be purchased online at rugpadusa.com or call at 800 565-6011.
15. Moving Kitchen Appliances: Refrigerator wheels are generally about 1” in diameter. When factoring the weight of the refrigerator the force at the wheels can amount to thousands of pounds per sq. inch. As the refrigerator is moved this can create dent trails in the wood floor. To prevent such damage use Glide N Guard protectors. These glides are widely available on line for between $20. and $30.

16. Desk Chairs: Chairs with double barrel wheels must be used. A clear floor protector mat must be used in combination with the proper wheels. Chair pad must have a smooth bottom. No pads with barbed bottoms can be used.

Preserving NuOil® Surface
Please note scratches are not covered under warranty.

1. Use NuOil® Natural Cleaner Exclusively: This product is designed to preserve and feed the oil finish. It contains natural oils and cleaners and is a vital part keeping the finish fresh.

2. Apply ReNu When Needed: The recommendation is 4 months or more, as needed. If traffic patterns or dullness occur in the surface it is time to apply ReNu to the surface. Waiting too long can lead to excessive wear in the finish and compromise the finish.

Preparation for NuOil® ReNu

1. Vacuum and clean surface.

2. As needed or every four months.

3. Remove Rugs & Small Furniture from Room or Simply Apply to Traffic Areas: In preparation or application of ReNu you may wish to remove furniture and area rugs from the room. Larger furniture pieces can be left in place. Rugs can be put back in place 4 hours after application of ReNu. Or simply apply to traffic areas.

4. Clean floor with NuOil® Natural Cleaner: In preparation for application of ReNu.

5. Gently Shake ReNu for 30 Seconds.

6. Mist ReNu onto Floor: Using enough renew to keep applicator wet. Spread ReNu the direction of the grain (length of board) applying a thin film of ReNu on the surface. Use small amounts at first to become accustomed to the product. Rub product in with applicator pad or if you desire with a clean white terry cloth towel. A second coat can be added if desired after two hours.

7. Allow the floor to thoroughly dry: ReNu is generally dry enough to walk on in one hour. ReNu is generally completely dry within 4 hours. Do not place area rugs on floor until completely dry.

8. Resting Rags or Pads: If a pause is needed during applications place applicator pads or towels on a small sheet of clean cardboard to prevent over soaking an area and leaving a thick spot.

9. Two or three times per year (as needed) the traffic areas can be treated with ReNu, without moving furniture. If any lap marks are left between the treated and untreated areas, simply apply NuOil® Natural Oil Cleaner and rub out the lap mark with a white terry towel.

10. Once a year (optional) It is possible to move all furniture to one side of the room and move back six hours later.

Expansion & Contraction: Although cross-engineered hardwood floors are much more dimensionally stable than solid hardwood floors, there are a few things to remember. As a product of nature, wood reacts to changes in temperature and humidity. Small gaps between planks are a normal occurrence with changes in relative humidity. These gaps are seasonal and show up primarily in the winter when cold temperatures lower the relative humidity in the air. hardwood flooring performs best at relative humidity rates between 30 and 55% and temperatures between 50 and 80°F.
Ultraviolet Light & Color Changes in Floor: Wood reacts photochemically to UV rays from the sun and indoor lighting sources. In furniture this effect is referred to as “patina”. The degree of reaction varies from species to species but is most pronounced in tropical species such as those used in Hallmark Floors Exotics. Solar UV film and, in some areas where heavy sunlight is experienced, solar screens can minimize the speed and degree of change but cannot stop it entirely.

Natural Visual Characteristics: Our wood floors are created to showcase the natural beauty of wood. As such, the planks will contain natural mineral deposits/streaking, and both closed and filled knots. Boards include an array of light and dark portions depending if the wood comes from the inner (heartwood) or outer (sapwood) section of the tree. Style: At Hallmark Floors, we have the right style, species, texture, gloss level, board width and length to fit any décor. Please ask your dealer about the Hallmark Collections with ReNu 2 Stage Hybrid Oil Finish. Available in the Alta Vista, Ventura, Organic Solid, Organic 5,6,7 and Novella Oak Selections.

Touch Up Kits: Containing colored markers, crayons and finish touch up can be used for minor damage to the floor.

Re-coating and Finish Alterations: In some cases application of applied finishes may be necessary to correct excessive wear, or overcome maintenance related damage (not covered by warranty). Hallmark Floors requires the use of Hallmark Restoration Oil to top-coat our floors (see caution). For more info, see full instructions for use of Restoration Oil.

For Light Finish Wear: These products can be applied by the homeowner with a Micro Fiber Pad. All furniture must be removed from the room for this recoat of oil. Drying time is 6 to 8 hours and furniture can be moved back in within 12 hours. Do not place rugs back on floor for 3 weeks. See full instructions for use of Restoration Oil.

Please note scratches are not covered under warranty.

Heavier Wear (professional use): The floor should be cleaned with Hallmark Floors TrueClean® and buffed with a white pad. A 10’ x 10’ area should be done at a time until entire floor is cleaned. Change pads frequently. Go over floor a second time with clean pads to ensure all dirt has been removed.

Restoration Oil should be applied with a low speed buffer and a white pad. Multiple coats may be required based on level of damage to floor. Caution: Rags, Micro Fiber Mops and buffing pads must be disposed of in a fire safe way as they are flammable.
